The annual percentage rate (APR) on a mortgage is a better indication of the true cost of a home loan than the mortgage interest rate by itself. The APR takes into account not only the mortgage rate, but also things like closing costs, discount points and other fees that are charged as part of the loan. This Mortgage APR Calculator takes all of ...

Annual percentage rate (APR) explains the cost of borrowing, and it's particularly useful for credit cards and mortgage loans. APR quotes your cost as a percentage of the loan amount that you pay each year. For example, if your loan has an APR of 10 percent, you would pay \$10 per \$100 you borrow annually.

### **How to Calculate Annual Percentage Rate (APR)**

An annual percentage rate (APR) is a broader measure of the cost to you of borrowing money, also expressed as a percentage rate. In general, the APR reflects not only the interest rate but also any points, mortgage broker fees, and other charges that you pay to get the loan.
