Optical Fiber Communications Solved Question paper June ...

In the elements described as fiber optics light travels by virtue of this effect but it does so in a number of ways; monomode, multimode, step index, gradient index and so on. For lighting purposes or, to be more exact, to handle visible light, the standard type of fibers are the so-called multimode step index fibers.

Optical communication and networks Notes. It does this by varying the current flow through the light source. The two types of optical sources are light-emitting diodes (LEDs) and laser diodes. The optical source launches the optical signal into the fiber. The optical signal will become progressively weakened and distorted because of scattering,...
