Bob, The borrow-payback functionality is explained in the Oracle project Manufacturing User Guide. You create a transaction to borrow existing inventory of item A from one project (project X) lending it to (project Y). Project manufacturing records the cost of the the item at the time it was borrowed, which is nice if you are using average costing.

In 11i MRP user guide, I found following statement 'The schedule group, build sequence, alternate BOM, alternate routing, and demand class can only be updated for planned orders being released as discrete jobs or discrete jobs being rescheduled. The schedule group has a list of values which lists all schedule groups from WIP for the organization in the supply record.
