Improved Sampling. Improved adaptive sampling: Adaptive sampling is now much more effective and predictable than before. Improved skydome sampling: Skydome light's sampling has been improved, in particular in darker areas. Note that existing scenes which were adjusted with previous versions of Arnold will now need to lower down the number of light samples for an equivalent result.

Changing the exposure on a light (using linear decay both on the Maya fluid, and on the Maya volume) to 3.65 (that's approximately equal to a $4 \times \pi$ multiplication) resolves this. Arnold uses area lights, and the Maya software does not, however mental ray does. It is not a good idea to compare Arnold renders with the Maya software render.
