Mercury 225 HP Optimax Problems. Re: Mercury 225 HP Optimax Problems I have twin mercury 225 1999 optimaxs, they both have low hours around 350. The port motor started off by giving me trouble starting it, then it would run fine for around 4 hours then just lost power all the way down (not to safe mode).

This is the common problem on the mercury fuel line with red writing on the fuel line . The fuel line has been updated by mercury and now has blue writing on the fuel line .

### **Mercury fuel line problems**

When the engine is in the run state, the PCM calculates the fuel consumed to determine when to turn the lift pump on. On a Verado based engine, the PCM will not cycle the lift pump until it has counted 150 grams of fuel used. On a 75-115, the PCM will not cycle the lift pump until it has counted 60 grams of fuel used.

Optimax Fuel Rail Assemblies Fuel Rails are simple yet they can fail. The most common cause of failure is from corrosion and/or water intrusion. Only the Port Fuel Rail is water cooled but in the event of a failure, water will pass through to the starboard fuel rail. A bad Air Compressor head seal can force water into the fuel rails.
