The below is a list of all procurements at Maricopa Integrated Health System that have been awarded.

MIHS Awarded Procurements

Tricuspid insufficiency (TI), also called tricuspid regurgitation (TR), is a type of valvular heart disease where there is failure of the heart's tricuspid valve to close properly when the ventricles contracts. This defect allows the blood to flow backwards, reducing its efficiency. Regurgitation may be due to a structural change of components of the tricuspid valve apparatus, a lesion can be ...

Abstract Numerous access and sheath options are available to the interventional cardiologist when performing percutaneous transcatheter procedures. Depending on the procedure, the radial, brachial, or femoral access routes may be used for coronary angiography. Once access is achieved,

sheaths offer physicians a safe method for exchange of multiple catheters and wires.

A Perspective on Sheath Selection and Access Sites for ...

Heart failure develops when the heart, via an abnormality of cardiac function (detectable or not), fails to pump blood at a rate commensurate with the requirements of the metabolizing tissues or is able to do so only with an elevated diastolic filling pressure. See the image below.

Cardiac arrest is a sudden loss of blood flow resulting from the failure of the heart to effectively pump. Symptoms include loss of consciousness and abnormal or absent breathing. Some individuals may experience chest pain, shortness of breath, or nausea before cardiac arrest. If not treated within minutes, it typically leads to death.. The most common cause of cardiac arrest is coronary ...
