Chronic Wound Care Guidelines

Between 1992 and 1996, the Agency for Health Care Policy and Research (now the Agency for Healthcare Research and Quality) sponsored development of a series of 19 clinical practice guidelines. These guideline products are no longer viewed as guidance for current medical practice, and are provided for archival purposes only.

Clinical Guidelines and Recommendations | Agency for ...

An acute wound has normal wound physiology, and healing is anticipated to progress through the normal stages of wound healing, whereas a chronic wound is defined as one that is physiologically impaired. To ensure proper healing, the wound bed needs to be well vascularized, free of devitalized tissue, clear of infection, and moist.

UpToDate

primary, secondary and tertiary levels. The availability of national guidelines will also provide guidance to policy makers. Healthcare is an ever changing science and advances and new developments in wound care will continue to take place. Thus, revision of these guidelines will be necessary as new knowledge is gained.
