Mountaineering axes (sometimes called "piolets" in Europe) are climbing axes designed specifically for alpinism. The head of a typical climbing axe has a pick-shaped point on one end, which can be plunged into snow or ice. The other end may have a hammer for placing pitons or an adze for chopping footholds into ice.

### **The Mountaineering Guide Guide: Sierra**

This is our signature comprehensive mountain climbing course that covers all aspects of mountaineering and is for those aspiring climbers that are more serious about learning the craft of alpine mountaineering. We begin with rock climbing training at front country crags in the Mammoth Lakes area of the Eastern Sierra.
