This is the very first codex for the Necron Army. It came out in August 2002 for the third edition of Warhammer 40K. It is 64 Pages long and it goes over the background of the Necrons, their wargear, special rules, army units, and special characters. It is a good read if you wish to start a Necron Army.

The Necron side of the story has barely progressed. Here's basically the only thing that's new: The new codex doesn't acknowledge newer lore mentioned I wish there was some way I could complain to GW about this, because the quality of the codex is just incredibly sub-par and I feel cheated.

Necron Wraiths are gone, replaced by Canoptek Wraiths, which look like the old Wraiths mixed with Tomb Spyders, and Pariahs are gone too (but you could still use your old Pariah models as Lychguard, since Lychguard also have Warscythes). 6th ed has dropped and the new FAQ's strongly favor the Necrons.

Basically, it's back to 3rd edition for the Necrons. Though this isn't a very big buff since it'll only help against toughness 8 or above models. The 7th Edition Update had either price cuts or stayed the same from the 5th Edition codex. Still, compared to Space Wolves we got a point increase on our Cron-ssants.

I was just randomly thinking, are Necrons getting a update anytime soon? I heard that 'Nids and Orks will be getting new Codex's and the SOB already are in 6th Edition. Will Necrons be getting one by any chance? Any rumors? I mean, there was a lot of controversy about the last Edition update ( I personally liked it )

Necrons are a very fast army. This has been true since the new codex dropped, but is even more true in 6th edition. First of all, a Night Scythe can zoom 36" and still drop off it's passengers via the Invasion Beam ... and if it wants to, it can then flat out move another 12-24" right off the board - or add its own fire to the fight.

Doubtful given the "One codex every two months" strategy GW has adopted now, even if the mega-releases of 5e are now a thing of the past.
