Documentation is quite vast and a bit chaotic -- could anybody post some links to 'step-by-step' instructions Versions (all software 64bit): Oracle 10g Release 1 (10.1.0.3) Operating System - SuSE Linux Enterprise Server 9 SP3 with all updates Hardware: two identical IBM xSeries 346 TIA

Oracle 10g Standby Database | Oracle Community
Data Guard normally ships redo as it is generated, Data Guard does not normally wait for an archive redo log to fill up. If data guard did that -- you would always be behind by an archive redo log at least -- you would lose lots of data during a failover! see

Data Guard - Oracle Ask TOM
Data Guard Physical Standby Setup in Oracle Database 11g Release 2. Data Guard is the name for

Oracle's standby database solution, used for disaster recovery and high availability. This article contains an updated version of the 9i physical standby setup method posted here.

Data Guard Physical Standby Setup in Oracle Database 11g ...

Multitenant : Copying a PDB in a Data Guard Environment in Oracle Database 18c. The multitenant architecture brings some complications where Data Guard environments are concerned. New pluggable databases (PDBs) created from the seed, or as a clone of an existing PDB in the local root container are handled automatically by Data Guard.

SAP DR site - Oracle dataguard 10g

We are running an Oracle 10g database on AIX 5.3. We are also setting up a physical standby at another site and are going to implement Oracle Data Guard. All the documentation I have indicates that it is prefered to use the SPFILE for the Oracle database and Data Guard. For other reasons we need to keep using the PFILE.

Using PFILE over SPFILE with Oracle 10g database and ...

Hi KV, You mentioned that you created a standby database from RMAN backup, but you also have to set the primary to send the archives to the standby. Have you done that? This can be done manually by setting "log_archive_dest_n" parameter to "service=<service>" where <service> is a TNS entry to the standby.
